

Archina Design is an architectural and interior design company established in 1992. Their main focus is providing complete designs for various types of buildings and interiors, with a specialisation in hospitality, office, multi-use, commercial, and residential structures. They also offer design services for 3D renderings, models, art cooperation, procurement, and construction management.

The company has completed projects primarily in the Czech and Slovak Republics, as well as other European cities such as Zagreb, Walbrzych, Paris, Sofia, and Moscow. They have two offices located in Prague and Bratislava, with a team of 18 professionals.

Archina provides design services for new construction, renovations, and combined constructions, including architectural,

structural, construction, mechanical, electrical, and specialised components. They offer design services for the architectural study, planning and building permit stages, tender, execution, and as-built design. The company also provides architect and technical supervision, procurement, and construction management.

Interior design services are provided for all types of spaces, specifically hotels, offices, commercial centres, multi-use and residential buildings. Archina collaborates with major international hotel companies such as Intercontinental, Marriott, Hilton, and Rezidor.

Designing various commercial elements such as case goods, loose furniture, lighting, carpets and rugs, steel and glass objects, sanitary items, and casino games are also

part of Archina's portfolio. They provide 3D renderings and applied graphic design services.

Cooperation with artists in various types of art is a significant part of their activities. Completed projects feature art in graphics, oil paintings, statues, glass and steel objects, lighting objects, photography, and tapestries.

Their projects have been featured in various hospitality and design magazines, including HotelSpec, Sleeper, and Building World. They have received awards such as the European Hotel Awards 1999 for the Hotel Radisson SAS Prague, and the Best of Czech Hotel Realty 2007 for the Grand Hotel Zvon České Budějovice. The interior of Café Imperial Prague was also selected as one of the ten most beautiful café restaurants in the world.

Archina Design undertook the task of rebuilding and expanding two historic

structures to form the Ascanio Boutique Hotel. The Ascanio Boutique Hotel is located in Prague 1, at the intersection of Jeruzalemska and U Pujcovny streets, situated in the heart of the city center.

Their first step was to transform the buildings into a luxurious five-star hotel, followed by designing the guest rooms, public spaces, and back-of-house facilities. Due to the UNESCO World Heritage status of both buildings, Archina had to adhere to the regulations set forth by the city's heritage department.

Archina's dedication to creating unique and visually stunning designs is evident in their incorporation of art into their projects. With their highly skilled team and commitment to quality, the company continues to be a top choice for clients seeking exceptional design services.
